Section 4
Discussion

CL01052

Section 4

Discussion

4.1 Hazardous Substances

No bulk fuel or hazardous substance storage tanks were identified during the site visit.

No bulk fuel or hazardous material storage is indicated in the historic information for the site.

No hazardous waste generation activity is indicated in the file information for the site.

One potential hazardous material incident may have been indicated in the AZDEQ historic information for the site, however this incident is not considered significant.

4.2 Hazardous Substance Containers and Unidentified Containers

No hazardous substance containers were observed around the site.

No hazardous substance containers or unidentified containers were observed on properties adjacent to the site.

4.3 Storage Tanks

4.3.1 Above Ground Tanks

No above ground storage tanks were observed on site.

4.3.2 Underground Storage Tanks

No visual evidence of active underground storage tanks (vents, fill lines, etc.) was observed on the site during the visit.

CL01053

4.4 Indications of PCB's

No PCB containing electrical equipment (equipment labeled as containing PCB) was observed on the site. Pole mounted transformers were observed on site. None appeared on visual evaluation to be leaking.

4.5 Indications of Solid Waste Disposal

A very minor amount of solid waste disposal was noted at several locations on and around the site. The waste includes mostly typical household trash and/or litter.

Other than the wastes noted above, on site solid waste disposal was noted.

4.6 Potential Migration Pathways

The risk of migration of contaminants from adjacent properties to the site is considered low to moderate. Drainage from the mining operations, both historic and current, to the east of the site flows through portions of the site. It is unknown if sediments carried by surface runoff from these areas contain heavy metals at levels that would be of concern.

The risk of off site migration of contaminants from the site is also considered low.

4.7 Asbestos

A survey for the presence of asbestos containing materials was not performed. There are no significant buildings on site.

CL01054

Section 5

Findings and Conclusions

Based on the information summarized previously in this report, the findings and conclusions of the assessment are as follows:

1. The site currently consists primarily of open space. The site is accessible by four wheel drive vehicles via a network of paved, and sand and gravel roads. The Detrital Wash and several of its tributaries occupy portions of the site.
2. A minor amount of litter was noted at several locations on and around the site.
3. One potential hazardous material incident may have been indicated in the AZDEQ historic information for the site, however this incident is not considered significant.
4. The White Hills area was originally settled as a mining area in the 1890's. The area was largely abandoned in the early 1900's. Some mining activity persists today. Runoff from the mining area flows through portions of the site.

The following environmental conditions or concerns were identified during the assessment:

1. It is unknown if sediments carried by surface runoff from the mining areas east of the site contain heavy metals at levels that would be of concern.

Section 6

Recommendations

Based on the information summarized previously in this report, the following activities are recommended:

1. Evaluation of sediments in some of the surface drainage ways is recommended to evaluate effects mining activities have had on the site.
2. Removal and proper disposal of the litter present on the site.

CL01058

**Section 7
Limitations**

CL01059

Section 7

Limitations

Stanley Consultants, Inc., obtained information regarding practices, conditions, and test data from the client and/or the property owner/operator during the performance of the environmental assessment. Stanley Consultants is relying on the accuracy of this information for the preparation of this report. Stanley Consultants assumes no liability or responsibility for the accuracy, precision, misrepresentation or withholding of information by the client and/or property owner/operator or for items not visible, accessible, or present on-site at the time of investigation.

The findings set forth in this environmental assessment report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed upon services or the time and budgeting restraints imposed by the clients.

The purpose of a Phase I Environmental Assessment is to review documentation pertaining to environmental concerns and to evaluate current environmental liabilities of the property. Stanley Consultants does not assume responsibility for the elimination of hazards that could possibly cause accidents, injuries, damage, or liabilities. Compliance with the proposed recommendations and/or suggestions as found in this report in no way guarantees elimination of hazards or warrants the property owner/operator's regulatory responsibilities to the appropriate regulatory agency of any conditions, releases, or discharges that are reportable under local, State, or Federal regulations. The Phase I Environmental Assessment was conducted and prepared in accordance with ASTM E1527-00 standards. No attempt was made in determining potential radon hazards, asbestos hazards, or lead containing paint hazards on the property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Elapsed ASTM days: Provides confirmation that this EDR report meets or exceeds the 90-day updating requirement of the ASTM standard.

FEDERAL ASTM STANDARD RECORDS

NPL: National Priority List

Source: EPA

Telephone: N/A

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Source: EPA

Telephone: 703-413-0223

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-413-0223

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

RCRA: Resource Conservation and Recovery Act Information

Source: EPA
Telephone: 800-424-9346

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING**NPL LIENS: Federal Superfund Liens**

Source: EPA

Telephone: 202-564-4267

Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

UMTRA: Uranium Mill Tailings Sites

Source: Department of Energy

Telephone: 505-845-0011

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized. In 1978, 24 inactive uranium mill tailings sites in Oregon, Idaho, Wyoming, Utah, Colorado, New Mexico, Texas, North Dakota, South Dakota, Pennsylvania, and on Navajo and Hopi tribal lands, were targeted for cleanup by the Department of Energy.

RAATS: RCRA Administrative Action Tracking System

Source: EPA

Telephone: 202-564-4104

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

BROWNFIELDS DATABASES**AUL: DEUR Database**

Source: Department of Environmental Quality

Telephone: 602-771-4398

Activity and use limitations include both engineering controls and institutional controls. DEUR and VEMUR sites.

DEUR: Declaration of Environmental Use Restriction. A restrictive land use covenant that is required when a property owner elects to use an institutional (i.e., administrative) control or engineering (i.e., physical) control as a means to meet remediation goals. The DEUR runs with and burdens the land, and requires maintenance of any institutional or engineering controls. VEMUR: Voluntary Environmental Mitigation Use Restriction. A restrictive land use covenant that, prior to July 18, 2000, was required when a property owner elected to remediate the property to non-residential uses. Effective July 18, 2000, the DEUR replaced the VEMUR as a restrictive use covenant.

US BROWNFIELDS: A Listing of Brownfields Sites

Source: Environmental Protection Agency

Telephone: 202-566-2777

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
